DATE:
Thursday, 22 November 2018
- Conference starts 8:30 am
- Panel Session 3.30 pm

NETWORKING SESSION:
From 5pm - onwards
Drinks and canapés will give Industry attendees, and UQ staff and students the chance to network.

VENUE:
The University of Queensland,
Experimental Mine Site,
40 Isles Road
Indooroopilly
Brisbane, QLD 4068

SMI HDR CONFERENCE 2018

The University of Queensland has ranked number one in the world for Mining and Mineral engineering*

"These results are a testament to our School’s high level of industry collaboration, as well as our research quality and its impact across the resources sector" Mechanical and Mining Engineering Head of School Professor Ross McAree.

Sustainable Minerals Institute (SMI) Director, Professor Neville Plint, said UQ was fortunate to have the deep technical knowledge to find solutions to the sustainability challenges of the global minerals industry.

SMI is a key research institute for mining and mineral resources at The University of Queensland where we foster relationships and collaborate with industry, government, non-government organisations and communities to develop innovative solutions to the sectors complex challenges. SMI currently has over 78 Higher Degree by Research (HDR) students and since 2011 has undertaken research projects worth more than $153 million.

Each year, SMI hosts a one-day conference where current HDR students present their work with the aim of providing students with the opportunity to hone their presentation skills and interact with industry professionals. UQ’s strength lies in the depths of discipline expertise and collaborative nature of its Institutes, Faculties, Schools and Centres. The HDR conference showcases UQ’s multi-disciplinary experience with students from SMI as well as the School of Mechanical and Mining Engineering, the School of Chemical Engineering and the School of Earth and Environmental Sciences presenting.

This year’s conference will be held on Thursday 22 November 2018 at UQ’s at Experimental Mine Site, Indooroopilly.
